## Question 1

Correct

Mark 1.00 out of 1.00

Given an array of N integer, we have to maximize the sum of  $arr[i] * i$ , where  $i$  is the index of the element ( $i = 0, 1, 2, \dots, N$ ). Write an algorithm based on Greedy technique with a Complexity  $O(n \log n)$ .

Input Format:

First line specifies the number of elements- $n$

The next  $n$  lines contain the array elements.

Output Format:

Maximum Array Sum to be printed.

Sample Input:

```
5
2 5 3 4 0
```

Sample output:

```
40
```

**Answer:** (penalty regime: 0 %)

```
1
2 #include <stdio.h>
3 #include <stdlib.h>
4 int compare(const void *a, const void *b){
5     return (*(int*)a - *(int*)b);
6 }
7 int main(){
8     int n;
9     scanf("%d", &n);
10    int arr[n];
11    for (int i = 0; i < n; i++){
12        scanf("%d", &arr[i]);
13    }
14    qsort(arr, n, sizeof(int), compare);
15    int maxSum = 0;
16    for (int i = 0; i < n; i++){
17        maxSum += arr[i] * i;
18    }
19    printf("%d\n", maxSum);
20    return 0;
21 }
22
```

	Input	Expected	Got	
✓	5 2 5 3 4 0	40	40	✓
✓	10 2 2 2 4 4 3 3 5 5 5	191	191	✓

	Input	Expected	Got	
✓	2 45 3	45	45	✓

Passed all tests! ✓

Correct

Marks for this submission: 1.00/1.00.
